

Product Data

2737.1 G3

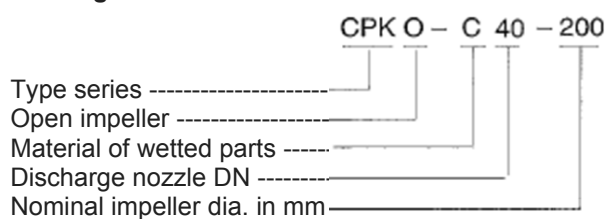

Chemical standard pumps
According to ISO 2858 / DIN 24 256 and ISO 5199
With Semi-open impeller

Technical Specification
Standardized chemical pumps
1. Design

Horizontal, radially split volute casing pump in back pull-out design, with semi open Impeller, single-entry, single-stage; to EN 22 858/ISO 2858/ISO 5199; Complemented by pumps of DN 25.

2. Application

Handling aggressive, polymerizing media or media liable to form lumps as well as gas-containing liquids in the chemical and petrochemical industries.

3. Designation

4. Operating data

	Parameters
Flow, Q	100 m³/h
Head, H	85 m
Nom. Sizes, DN	DN 25 to DN 65
Pressure, Bar	16 Bar / 25 Bar
Temperature limits	-70 to 300 Deg C
